## CARING FOR WHAT'S NEXT

BEING A FAMILY EVEN BEFORE BEING A COMPANY

Before being a company, Cartiere Carrara is a family: a family that for five generations has been carrying out with inspiration and passion, a life project devoted to the common good.

Today, and above all tomorrow.

As a family, Cartiere Carrara is aware that the Planet is our home, a home that must be loved and cherished for the sake of future generations.

Every year we consume nearly 93 billion tons of raw materials, three times more if compared to that which our grand parents used to use 50 years ago. **93 billion which will double by 2050 if we don't act now.**

And, as if that wasn't bad enough, **only 9% of these precious resources are reused** while 85 billion tons become waste to be managed by incineration, landfill and resources.

**Taking care of the future - like only a family can do - means having a deep respect for Nature and for the resources it offers to us: conscious use of raw materials, recycling and reduction of waste production are the foundations on which to build the world of our children.**

# SUSTAINABILITY

WE INVEST IN THE BEST FUTURE: THE ONE THAT STARTS NOW

Sustainability does not mean going back to the past but building for the future. To preserve our planet we must be great innovators by planning, designing and measuring the results day after day. For this - as a family - we work for:

## PRESERVE

- over **97%** of the materials used to produce products in pure cellulose are made from renewable raw materials from forests managed using environmentally sustainable practices.
- **56,8%** of the energy we use comes from renewable sources or from high-efficiency trigeneration plants.
- We constantly monitor the characteristics and quality of the waters coming from our production process, designated to be back into the environment.
- Our projects «**Green kilometer Lucca**» and «**Polycyclic Plantations**» improve the areas on which our activities impact, safeguarding and replanting areas with strong anthropisation, encouraging the "short supply chain" in the paper industry

## REDUCE

- We've reduced water consumption in the product cycle **by 25%** compared to the industry average.
- We've reduced energy consumption **by 2.7%** in the three-year period 2017-2019.
- We've reduced the amount of waste generated per unit of product **by 12.6%** in the three-year period 2017-2019.

## REUSE

- All production waste is channeled back into the production cycle, therefore limiting our consumption of non-renewable resources and reducing the amount of waste we release into the environment.
- **50%** of the water we use in production is reused.

## RECYCLE

- We've built production plants that **use recycled paper and cardboard as raw material** for the production of new product lines which contribute to recover and recycle materials that would otherwise be sent for disposal.

# COMFORT

PAPER IS THE RAW MATERIAL OF OUR COMMITMENT

Paper is the kind of product which is there with us in every moment of our daily life. For this reason, Cartiere Carrara, produces it with the same care a family shows their children. We feel a great responsibility with our products and our contribution in building a more sustainable model of economic development and our consumption from an environmental and social point of view, in order to guarantee everyone a future worth living.

Our products have always cared about the environment, the wellbeing of the planet and the generations to come. They are the tangible sign of our commitment to the future. The production process combines quality, innovation and sustainability, inspiring by the principles of the circular economy.

**The new COMFORT LINE product range represents the result of this continuous commitment, merging into our products the recycling and reuse of raw materials with the conscious use of water and energy.**

A new range created by reusing recycled and de-inked paper, which is transformed into high quality products, thanks to multiple investments in technology and innovation which Cartiere Carrara has done, and will keep doing, to make the production cycle increasingly sustainable.

**Because the Planet for us is «A PLACE TO CALL HOME»**

CarraraProfessional

Taking care of the future - like only a family can do - means having a deep respect for Nature and for the resources it offers. Conscious use of raw materials, recycling and reduction of waste production are the foundations on which to build the world of our children.

This is why **Cartiere Carrara** has created the **COMFORT** line - a new range of de-inked products - which reflects the mission that the Carrara family has given itself for a century and a half; carrying on an ancient art with seriousness and competence, continuously innovating and offering high quality products, using the most recent technologies and always respecting the environment and the community.
