# ESSENTIA ULTRA COMPACT AUTOCUT HAND TOWEL DISPENSER

## The Dispenser

The new ULTRA COMPACT DISPENSER automatically cuts and provides paper towels of different materials and lengths.

It is characterised by the elegant and captivating design typical of the ESSENTIA dispenser range and, as for all the Essentia dispensers, it is available in either black and white.

Its ultra-compact dimensions, among the smallest on the market, allow the dispenser to adapt perfectly to all environments.

## Hygiene

The ULTRA COMPACT DISPENSER has a water resistant design, which protects the paper roll from external contamination ensuring a high hygiene standard.

The efficient and effective Automatic Cutting system, combined with the possibility for the user of only touching the towels they use minimises any cross contaminations and avoids the creation of paper fragments inside the dispenser and in the surrounding area.

## Controlled Dispensing

The dispenser dispenses towels of 25cm length. Its delivery system ensures consumption control and reduces waste. Added to this is the combination to use a wide range of refill rolls, with different offering solutions suitable for different images, performance and cost in use needs.

## High frequency washroom areas and more...

Thanks to its unique features, its small size and the capacity for the broad range of rolls, the ULTRA COMPACT DISPENSER is perfectly suitable for high traffic washroom areas (such as airports, railway stations, fast food, shopping centres, etc.) and for work areas (WorkPlace) in Food and Non-Food production processes (such as industry, restaurant, meal preparation areas, workshops etc).
